

## **orbitwheel HAS NOW LAUNCHED**

A brand new concept for wheeled sports arrived in February when Inventist Inc. launched the Orbitwheel. If you've ever tried roller blading or skateboarding and disliked them, try the Orbitwheel. Orbitwheels can be used on almost any surface, even allowing the user to "skate" from cement to grass and back again. One of the best attributes the Orbitwheel boasts is the simplistic, lightweight design which allows for easy use. The number of tricks and creative maneuvers that can be performed while using the Orbitwheel are limited only by the imagination of the user. Best of all, the Orbitwheel has no buckles or clasps to fumble with when you want to be on the go. Just slide the Orbitwheel hoops on your feet and take off.

The Orbitwheel was so popular at the Toy Fair in New York that Inventist sold every pair it brought. Though Inventist expected the Orbitwheel to be popular with buyers, they did not expect the immediate level of enthusiasm that has already been seen. Don't wait, check out what the Orbitwheel can do, and pick one up for yourself, at [www.inventist.com](http://www.inventist.com).

Once you see the freedom and fun the Orbitwheel provides, you will see that the Orbitwheel is one new concept in wheeled sports that you cannot live without.

If you have questions about product licensing or would becoming a reseller of the Orbitwheel please contact us at [sales@inventist.com](mailto:sales@inventist.com).

### EVENTS

#### WE WILL BE ATTENDING

**International Home and Housewares Show**  
**Chicago, IL**  
**March 22-24, 2009**

You may also be interested in the [AquaSkipper](#), a human-powered watercraft that "skips" on the surface of the water. Keep an eye out for other products still in development, such as the [Hydroglider](#), an electric surfboard supported above the water by hydrofoil wings; the [Stepster](#), an efficient bike propelled by stepping instead of pedaling; and the [Swerver](#) and [Swerver Quads](#), Inventist's unique, improved versions of lean-to-turn roller skates. Please let us know if you would like to receive more information on any product or order a sample. We'll be happy to prepare a quote for you, or to answer any questions you may have.
